TO LOVERS OF GARDENS

A GOOD EXAMPLE FOR
ALL OF US
THESE TIMES—SAW WOOD

Someone has said that we were in the throes of a Depression; Someone else has said that we have been having a "price readjustment period." Whatever the fact may be, we are all seeking more commensurate enjoyments for our mental, physical, and financial outlays.

The turn to gardening that this condition has caused has been quite noticeable. But much aimless buying has resulted.

Aimless buying is always expensive. We all know the feeling of buying a shrub, six roses, a dozen plants, or a hundred bulbs, and then with spade or trowel in hand, trying to find a place to plant them. Such purchases usually end in a "deadly" spot. We all know what it is to be carried away by a beauteous description of some plant or shrub as it grows on the top of

the Himalayas or in the marshes of Lake Nyassa, and to be doomed to failure before we begin.

Now as never before, we urge that you plan your garden carefully, to avoid not only failures but unnecessary expense. Remember that we hold ourselves ready to assist you in this planning. Anything from an annual bed to a complete garden will receive our most careful consideration. We make no charge for this service, either at our store or in your garden.

In these few pages we have endeavored to collect together only those items as are the best adapted to our particular locality. Detailed information on each item is lengthy and oftimes futile. We will, however, gladly give detailed information on any that may appeal. Prices are definitely down. Qualities, however, remain at that high level we set for Garden Shop Merchandise in the beginning and which we shall continue to maintain.

A. B. CALKINS C. W. LARABEE H. G. WHIFFEN

SEEDS FOR FLOWERS OF SPECIAL MERIT

Pe Pack		Per Packag
AGERATUM—Blue Cap. A new dark blue type developed primarily for borders. The plants have little foliage	J	MARIGOLD—Guinea Gold. The compact plants, two and one half feet high, produce all double flowers. The usual
and resemble four inch balls\$.15	odor is somewhat modified
CALENDULA—Sunshine. The large plants produce large four inch blooms with incurving petals like a Japanese Mum. Golden yellow.	.50	MORNING GLORY—Double Rose Marie. An early flower- ing variety with rose pink, double flowers
Mulli. Golden yellow.	.00	NASTURTIUM-Golden Gleam. The finest novelty of last
CANDYTUFT—Miniature Gem. This new Candytuft is particularly adapted to use for the border, or for broadcasting thru the Rock Garden. It is pure white and		year. Produces a great number of golden, semi-double flowers on 18 inch vines. 50 Seeds, 35c; 15 Seeds
grows but 3½ inches high	.15	TITHONIA—Speciosa. More unknown than new. Native to Peru, the plant
CANTERBURY BELL—New Annual. The greatest objection to the old type was its biennial habit. In this new		resembles a dahlia, and the flowers are glorified orange cosmos. Grows six feet high, and almost without
type which blooms in six months from seed, the Canterbury Bell should come into its own. Mixed	.35	care. Our mid-western seasons are much to its liking
CYNOGLOSSUM—Amabile Pink. Introduced last season as a new departure in color for this flower	.25	URSINIA—Pulchra. The finest of the introductions for the border. The foliage is trim, finely cut, and the six inch
GEUM-Prince of Orange. An unusual coloring, deep		plants are smothered with orange, daisy-like flowers5
orange, in this deserving perennial. It should prove the most popular of its class	.50	VENIDIUM—Fastuosum. This South African Annual proved its value last year. Flowers are large, four inches a-
LARKSPUR—Gloria. The best of the newer larkspurs. Deep		cross, orange, with brown center zones
rose in color without tonings	.25	VIOLA—Arkwright Ruby. A splendid rich crimson
LEWISIA-Howelli. A low creeping perennial for the Rock		White Gem. A white form of Jersey Gem
Garden. Grows but three inches high. The bloom		ZINNIA—Lilliput Rosebud. A true rose-pink form like
scapes, six inches high, are covered with rose, star-like flowers. Delights in a hot, dry situation	.75	Salmon-Rose and Red Riding Hood

SELECT HYBRID TEA OR EVER BLOOMING ROSES

Under this heading we are offering only those varieties which have proved themselves by trial to be of the type most suitable for our rather trying climatic condition. Early in the season we are able to offer these plants with dormant roots, later it is necessary that they be handled only in pots, grow-

ing. Some rose lovers prefer one form or the other, and authorities as yet are unagreed on which form is the better. All, however, admit that for planting after the growing season starts, only potted plants should be used. Full cultural directions will be furnished with all our roses.

The following group of Roses, each dormant, 50c; Potted 60c

- ANGELE PERNET-Orange with brownish tone.
- COLUMBIA—Peach-blow pink; a large rose; long, stiff stems.
- DUCHESS OF WELLINGTON—Rated as one of the best 12; buds are golden orange, lightening with the maturing blossom; a strong bloomer.
- EDW. MAWLEY-Deep rich, velvet crimson.
- FRANCIS SCOTT KEY—Deep red, large flowers, very double; very strong grower.
- GRUSS AN TEPLITZ—Dazzling, flery crimson; always in bloom.
- HADLEY-Deep rich velvety crimson.
- JOHN RUSSELL—Crimson; one of the finest red roses; large ovoid buds with the flowers developing in the manner of the hybrid perpetuals.
- JONKHEER J. L. MOCK—A two-tone pink, reverse silver white; blooms of magnificent size and form.
- KAISERIN AUGUSTA VICTORIA—The best of the white roses, faintly suffused with lemon yellow; a splendid grower.
- KILLARNEY—Double white; a fine white of splendid form and great substance.
- LADY HILLINGDON-Solid deep apricot yellow.

- LA FRANCE—Bright pink with silver cast; very old but has the true rose fragrance.
- MAMAN COCHET—Probably the most valuable Tea for this section; fine deep pink blooms with splendid foliage.
- MME. EDW. HERRIOT—Buds long, slender, coral red, shaded with yellow at the base; opens rosy scarlet, passing to shrimp red.
- MRS. AARON WARD—A distinct Indian yellow shading lighter toward the edges.
- MRS. CHAS. BELL—A sister to Pink Radiance; color, beautiful shell pink; has all the good qualities of the Radiance Rose.
- OPHELIA-A creamy-pink bloom with golden tone.
- PREMIER RED-Deep red; very fragrant; thornless and free blooming.
- RADIANCE PINK—Our best pink rose, displaying a beautiful rich and opaline pink; averages fifty roses per season and is the best grower and most profuse bloomer of all the pink roses.
- RADIANCE RED—The exact counterpart of Pink Radiance in growth and bloom, except it is a deep rich red.
- SOUVENIR DE CLAUDIUS PERNET—Long buds, very large, full flowers of clear sulphur yellow; a wonderful garden rose.
- SUNBURST—Orange copper and golden yellow; an extremely brilliant effect; very fragrant.

The following group, each, dormant roots, 70c; Potted, each, 80c

- BETTY UPRICHARD—Delicate salmon pink to crimson; outer petals glowing carmine with copper and orange overlaid.
- DAME EDITH HELEN—Pure glowing pink, long buds, strong grower; foliage bronze; one of the new roses; most satisfactory.
- ETOILE de HOLLAND-Rated as the finest of the crimson roses.
- MARGARET McGREDY—One of the finest of the newer roses; color is orange, vermillion splashed; very vigorous.
- MME. JULES BOUCHE—Large white bloom shaded to blush in the center. Plant is strong grower and free flowering.
- PADRE—Copper scarlet with bright yellow at base of petals; flowers semi-double with curiously notched petals.
- TALISMAN—The most remarkable coloring that we know in any rose; outside of petals bright yellow; inside, golden pink; as petals unfold they become bright apricot, gold or old rose.

NEWER VARIETIES OF HYBRID TEA ROSES WITH SPECIAL MERIT

- AUTUMN—A tall grower that produces fine brilliant scarlet buds on long stems. The flowers open in rich golden-yellow and crimson flowers. Each......\$1.15
- CHARLES P. KILHAM—This rose surpasses in number of flowers produced and equals the coloring of the popular garden rose, Mme. Edward Herriot. Each\$1.25
- DAZLA—The most brilliant of all roses. Bright orange and scarlet with wide flush of gold. Each......\$2.00
- EDITOR McFARLAND—Scintillating pink with a veil of amber. Long stems vigorous Radiance type. Each......\$2.50

TAKE THY PLASTIC SPADE, IT IS THY PENCIL: TAKE THY SEED, THY PLANTS, THEY ARE THY COLORS—Mason

NEWER VARIETIES OF HYBRID TEA ROSES WITH SPECIAL MERIT

HORTULANUS BUDDE—Bright red flower born in unrivalled profusion throughout the summer. Each	OLYMPIAD—Lustrous dark oriental scarlet, intensified by a golden coloring at the base of the petal. A rose of splendid form at all times. Each
POLYANTHA OR BABY ROSES	AUSTRIAN BRIAR ROSES
Useful for low hedges and borders; very hardy and continually in bloom. GEORGE ELGER—Copper yellow. Very free flowering. Each\$.75	These roses grow large, are perfectly hardy, and are suitable for shrub borders.
IDEAL—Dark scarlet. Profuse bloomer. Each	HARISON'S YELLOW—One of the old fashioned double yellow roses; very hardy; blooms only in June but is at that time a perfect mass of bloom. Each
	PERSIAN YELLOW—Medium size deep yellow double flowers; very hardy; to flower freely should receive little or no pruning. Each \$.75
	HUGONIS—Commonly known as the Sacred Rose of China; a very hardy single yellow rose producing great masses of flowers along the entire length of stem. Each

HARDY CLIMBING AND RAMBLER ROSES

2 Year Heavy, St	rictly No. 1 Stock
AMERICAN PILLAR—A single flowering variety of great beauty; flowers very large, lovely pink petals with white eye and yellow stamens; flowers are borne in great bunches. Each\$1.75 AVIATEUR BLERIOT—The flowers, born in clusters, are saffron blushed crimson while in bud, yellow in full flower, fading to white. A superior plant with fine foliage. Each\$\$\$	MME. GREGOIRE STAECHELIN—The most beautiful of all the pink climbers. The huge ruffled blooms are unlike any other climber and are produced in astonishing abundance. A meritorous introduction from Spain. Each
A Rose Gem for the Rock Garden	TREE-SHAPED ROSES We offer the following as the best of this class of Roses for this locality. Stems are 36-42 inches high.

ROSA ROULETTI-A wild species of rose that is ideally adapted to the rock garden. Grows in compact bush form about six inches high. Covered throughout the season with semidouble pink flowers of good form but tiny in RADIANCE—The most popular pink.....\$3.00 RADIANCE RED—Brilliant cerise.....\$3.00

We respectfully urge that you join the Kansas City Chapter of The American Rose Society, and support the Kansas City Municipal Rose Garden at the Jacob L. Loose Memorial Park. Full particulars can be obtained from Mrs. Clifford Smith, 814 Westover Road, City. Telephone Hiland 4367.

SUMMER FLOWERING BULBS

or for the border.							
BEGONIA—Tuberous	Rooted.	These	are sp	lendidly	adapted	to g	row-

BEGONIA—Tuberous Rooted. These are splendidly adapted to growing in the shade or for porch boxes. Plants are 1 foot high with large blooms. Red, pink, salmon, or white.

2" Apy color Single Fach 30: Dog \$3.00

CALLAS—Giant Golden Yellow. Can be very successfully grown in the border during the summer. Will grow in shade. Plenty of water should be supplied to increase size. Jumbo Bulbs. Each .50; Doz. \$5.00.

CANNAS—We believe the most satisfactory way of getting these plants is to buy potted plants about the 1st of May. These will come into bloom a month before those started from bulbs, and are little more expensive.

DAHLIAS

The following list of dahlias has been prepared for us by a local authority. These he says are the cream of the old and new in the different types, the ones that can be depended upon to give the maximum amount of bloom. Many that are equally lovely in cooler climates he has eliminated as they produce inferior results in this locality.

INSECTICIDES

Size of Price

ANTROL—For control of ants. Sets of Jars and Poison......\$1.00

ARSENATE OF LEAD—Standard poison for leaf-eating insects.

½ lb., \$.20; 1 lb., \$.35; 4 lbs., \$1.00

BLACK LEAF 40—Nicotine solution for sucking insects. 1 oz., \$.35; 5 ozs., \$1.00; 1 lb., \$2.10

BORDEAUX MIXTURE—The best fungicide for blights and rots.
1 lb., \$.40; 4 lbs., \$1.00

LIME SULPHUR—Dormant spray for control of scale.
1 lb., \$.35; 5 lbs., \$1.50

ROSE POWDER (Garden Shop)—A specially prepared powder to prevent all Rose Diseases, and to kill all leaf chewing insects that infest Roses. Colored a medium Green to minimize its appearance on the foliage. 1 lb., \$.40; 5 lbs., \$1.50.

SNAROL—A remedy to control slugs, snails, sowbugs, grasshoppers. 1 lb., \$.45; 3 lbs., \$.95

SULPHUR—Dusting. 1 lb., \$.15; 5 lbs., \$.50; 10 lbs., \$.80; 25 lbs., \$1.75.

TREE TANGLEFOOT—Protects against crawling insects.

1 lb., \$.55; 5 lbs., \$2.25; 10 lbs., \$4.50

VOLCK-Effective for use against scale and sucking insects.

½ Pt., \$.50; 1 Pt., \$.75; 1 Qt., \$1.00

UNUSUAL PLANTS

BARBERRY, Verruculosa—The Holly Leafed Barberry—A splendid plant for the rock garden; beautiful throughout the year. 10-15" specimens; each\$2.25
CHERRY, Double Pink Weeping Japanese Flowering—This is the rarest and most beautiful of all the cherries; the flowers are large and are fully double; the seasons outstanding offering. Top-grafted, 6' stems, 3-year heads
CHERRY, Single Pink Weeping Japanese Flowering—This old favorite is still rare; its beauty of bloom is difficult to describe. Top-grafted, 5' stems, 4-year heads
CHERRY, Upright Red Flowering Japanese—Campanulata; the only truly red cherry; flowers single and bell shaped; early flowering. 8 foot specimens; each\$10.00
CLEMATIS, Jackmani—The old favorite with purple blooms; each \$1.00
CLEMATIS, Veitchiana—A handsome new climber from China; flowers are fragrant, yellow, and produced in the fall; each\$2.50
COTONEASTER, Praecox—The best of this class; new and very difficult to obtain; leaves glossy with wavy margins give the plants great beauty; the berries are large and produced in June. 18-24" specimens; each

FISH

We carry at our shop at 318 West 47th a line of Fancy Goldfish for use in Aquariums or in Pools.

Commons, Comets, Fringetails, Telescopes, Calico Telescopes, Veintails, Chinese Moors and Tropicals. Prices range from 10 cents up, according to size and type of Fish.

LAWN GRASS SEEDS

Every Lawn is a distinct problem. It is impossible to make a set of rules to apply to all. Seeding and Feeding are, however, the two most important factors. If you are having difficulty, call us. We make an inspection and recommendation without charge. The following kinds of grasses are the ones best adapted to our locality.

	LID.	o nus.
Kentucky Blue Grass\$.25	\$1.00
Red Top	.25	1.00
White Dutch Clover	.50	2.25
Annual Rye Grass	.25	1.00
Perennial Rye Grass	.25	1.00

LABURNUM, vossi (Golden Chain)—One of the most talked-of shrubs
in the world; it has long wisteria-like clusters of flowers that are
golden yellow in color.
3-4" specimens, each\$3.00
2 - 2,,,
DEACH Double Elements Western January Will to the transfer

PEACH, Double Flowering Weeping Japanese—This tree is similar in appearance to the Weeping Cherry but its bloom is double and red. 4-6' high, 4-year heads; each......\$4.00

VIBURNUM, Carlesi (Fragrant Snowball)—A dwarf compact shrub that bears pale rose flowers. Considered the finest introduction from Korea. Very sweet-scented. Specimen plants \$1.75

WISTERIA, Standard—This new introduction produces beautiful pink flowers in clusters; stems are 4' high; new; 3-year heads; each \$7.50

AQUATIC PLANTS

LILIES—While all water lilies are interesting, it is greater economy to buy the better sorts in the beginning as all of them increase rapidly. We recommend the following as being superior in their respective color classes.

CHROMATELLA-4-6 inch, yellow blossoms; mottled foliage-

EUGENIA DE LAND—Deep rose pink—each	\$1.50
GLORIOSA—Deep carmine changing to red—each	\$3.50
MARLIACEA ROSEA—Soft rose-pink—each	\$1.50
PAUL HARIOT—Yellow-pink-apricot—each	\$3.00
W. B. SHAW—Standard white—each	\$2.00

WATER HYACINTHS—Floating plants with lilac flowers—each.\$.10

GARDEN ORNAMENTS

In keeping with our policy on Garden Ornaments, we are again offering to the Gardening Public a representative collection of these items which includes not only the more standard items but also many of the finer things that are usually so difficult to find. It is impossible to

Gerlicullings Roberd Bricose
Muled State Bobalmont of
Bustan of Plant duductor

It is recorded that man was first tempted in a garden, and to this day the temptations of the garden are the most alluring that can be presented to him. Let him once eat of the fruit of the tree that grows in that garden and his innocence is gone. Thereafter, he is eternally figuring, laboring, indulging himself; slipping more and more under the spell, forgetting more his necessary work. He takes up with queer companions. He spends his money like a profligate. He even speaks a strange tongue. Would that a new Milton might arise to write this Spring and Fall of Man.

Richardson Wright in New York Gardens
